Cell: 650 804 8421

170 Seale Ave

Palo Alto, Ca 94301

Objective:

Looking for a position in the IT Administration department with the opportunity to learn and enhance my IT skills and knowledge while providing excellent customer service and support to a diverse community of users.

Networking Experience Summary: **2005-present: (Consulting for various businesses and entities)**

- System Administrator Assistant working with VMware ESXi virtual hosts.
- Transitioned a 15-person mobile startup company's network to a new facility. All telecom and networking systems were successfully operational on the day of the move. Created the company's telecom binder, documenting all networks, servers and connectivity.
- Installed and configured wireless consumer telecommunications systems (base station and wireless handsets)
- Configured 7 wireless consumer networks as well as multiple small business networks (10-50 hosts using Cisco, Extreme, 3com and D-Link network devices)
- Designed and managed consumer network (5 hosts)
- Maintained home and small business Linux and Windows servers (Debian, FreeNAS, Ubuntu, Windows server 2003/2008, Win7 Pro and Enterprise Mac OS X)
- Designed and built custom tools for managing networking devices (Cisco)
- Currently Managing a networking lab and tutoring CCNA students
- Familiar with iPhone configuration and support
- Experience with Google Apps and enterprise anti-virus deployment

- Installed two Cat6 backbone bundles for dedicated robotics team development lab (30+ hosts)
- Installed complete wiring harness for award winning wireless robot
- Sound tech at small pro audio company.

Current Position - Noise Free Wireless – January 2009 – Present – IT Engineer

- Responsible for PC configurations, Backup facilities, networking, telephony

- Established a company PC standard configuration to enhance effectiveness of IT support

- Transitioned the company's network to a new facility. All telecom and networking systems were successfully operational on the day of the move. Created the company's telecom binder, documenting all networks, servers and connectivity.

  - Built a sophisticated Audio Acoustic Lab for audio noise measurements, selected equipment, procured and installed lab and a separate control room.
